

QUALITY LINKAGE ASSEMBLY

To connect an actuator to a Termomix or Danfoss rotary shoe series of valves, the ET3 Linkage makes it a very simple process to gain your required control of the valve.

Manufactured from quality parts, the ET3 linkage has the facility to accept numerous size actuators from various manufacturers such as Gruner and Joventa.

The ET3 linkage is reusable in the event of a required valve or actuator change.

Part Number	Description
ET3	Actuator & valve linkage to suit our Termomix range of rotary shoe valves

FEATURES

- Easiest of Installations.
- Maintains cooling distance for actuator.
- Can accept various actuators.
- Manufactured from quality parts.
- Reusable
